A comprehensive 30-day hands-on program covering front-end, back-end, databases, and deployment. Designed to build real-world full stack development skills using technologies like HTML, CSS, JavaScript, React, Node.js, and MongoDB.

PROJECTS

MERN FULL STACK PROJECT (Excel Analytics Platform):

The Excel Analytics Platform is a full-stack web application built using the MERN (MongoDB, Express.js, React, Node.js) stack. The project aims to simplify the process of uploading, analyzing, and visualizing Excel data.

CRUD APPLICATION: This is a simple MERN (MongoDB, Express.js, React.js, Node.js) stack application. It serves as a template for building full-stack web applications using these technologies. User can perform CRUD (Create, Read, Update, Delete) operations on a simple data model.

REAL TIME CHAT APPLICATION: This project is a real-time chat application built as part of Task 2 for an internship assignment or coursework. The application provides a seamless and interactive messaging interface that allows users to exchange messages instantly over a WebSocket connection.
